## B-3210

### STEAM & RETURN LINE CORROSION INHIBITOR

#### APPLICATION:

PMC B-3210 is a liquid neutralizing amine to aid in controlling corrosion in steam condensing equipment and condensate return lines.

#### BENEFITS:

- \* Reduces steam trap and return line replacement.
- \* Reduces maintenance costs.
- \* Helps reduce iron returns to boiler system.

#### FEEDING AND CONTROL:

PMC B-3210 may be fed via a batch tank or neat. To prepare a chemical batch the B-3210 should be mixed with soft water or condensate. Introduce the mixture to the feed water tank or steam header as specified by your PMC Water Systems Services representative. Feed equipment and lines should be of corrosion resistant material.

Control of B-3210 is based on maintaining a minimum pH of 7.5 for the condensate returns. Dosages will vary depending upon the carbon dioxide content of the steam. For specific information contact your PMC Water Systems representative.

#### PRECAUTIONS:

PMC B-3210 is an alkaline product.  
Study Material Safety Data Sheet.

#### PACKAGING:

Plastic pails	24 KG
Poly drums	210 KG
