

PERFORMANCE 1001

ENVIRONMENTALLY FRIENDLY HIGH CYCLES COOLING WATER TREATMENT

APPLICATION:

Performance 1001 is a fourth generation organic open re-circulating cooling water treatment program. It has been specially formulated to meet today's tough environmental concerns. Performance 1001 utilizes new corrosion control technology which gives superior corrosion control over a broad range of conditions.

Performance 1001 utilizes proven deposit control agents which ensure optimum heat transfer performance, even when used in high cycles.

BENEFITS:

- * Program can be used a high system cycles (LSI 3.0)
- * No worries about accidental leaks or spills.
- * Contains no toxic heavy metals.
- * Program is very low in phosphorous
- * Program operates at a pH range of 8.0 9.5
- * Both iron and copper (& alloys) are tightly bonded, controlling corrosion.
- * Gives superior deposit control.
- * Can be used in soft or hard water systems.

FEEDING AND CONTROL:

Performance 1001 can be feed neat or via a mixing tank. Add continuously to the re-circulating water at any convenient point using a proportioning pump.

Control, based on test results or calculated feed rates and maintain Performance 1001 at 150 – 250 ppm in the re-circulating water. For specific recommendations contact you're PMC Water Systems Consultant.

PRECAUTIONS:

Alkaline product: Study Material Safety Data Sheet.

PACKAGING:

Plastic pails	25 KG
---------------	-------

Poly drums 230 KG
